

MOTORCRAFT®

LOADED STRUT TRAINING GUIDE

Why Loaded Struts?

When struts and springs need to be replaced, technicians now have the option of changing them as an assembled unit – with a Motorcraft® Loaded Strut. These are designed as an assembly with a coil spring and strut mounted together and bolted in as a single unit to save time and improve safety during installation.

- Speed - a single bolt-in assembly changed in a fraction of the time required for a traditional spring/strut repair
- Safety - does not require coil compression, eliminating costly equipment, time and possibility of injury during compression of coil

Why Motorcraft Loaded Struts?

Our Loaded Struts are engineered to demanding Ford standards and are the only OE-spec, ready-to-install loaded strut assemblies recommended by Ford Motor Company for Ford and Lincoln vehicles.

- Application-specific designs that help restore the original ride and handling
 - OE quality, design and testing
 - Competitive pricing
- Ready to install with no special tools required
- Backed by a limited lifetime warranty with unlimited mileage** and labor included*

**MOTORCRAFT®
WARRANTY**

**UNLIMITED
MILEAGE**
INCLUDES LABOR*

Limited Lifetime**

*Limited labor costs.
**See seller for limited warranty details. Defect only. Original purchaser and receipt required.

MOTORCRAFT® LOADED STRUTS

The only OE-spec loaded strut in the marketplace for Ford & Lincoln applications

OE Quality Components

- 100% OE dust boots help protect the strut rod and seal from dirt and debris
- 100% OE springs manufactured from high-quality steel are calibrated to restore correct vehicle ride height
- Complete strut and spring assembly replacement helps achieve original vehicle ride characteristics
- 100% OE shocks/struts with application-specific valving engineered to help restore vehicle's original ride and handling

Ford-Designed Testing

- Coil spring and strut are engineered and tested to demanding Ford specifications
- Rigorous coil spring testing includes:
 - Fatigue resistance – tested to 200,000 cycles
 - Surface quality defects must be <100 microns in depth
 - Corrosion – 3,000 hours of salt spray
- Strut Testing includes:
 - Cylinder tube fatigue - 16,000 cycles front; 24,000 rear
 - Valve durability - 1 million cycles
 - Temperature testing - no leakage or structural damage
 - Dust boots pass 40,000 cycles

Excellent Performance

- Application-specific design helps restore original ride and handling

OE Components

- Precision components for smooth, quiet, long-lasting life

*3.5L gas and 2.5L hybrid

NEED STRUTS? WE'RE LOADED.

New from Motorcraft®, a line of loaded struts to fit Ford and Lincoln models. With the spring already in place, they're easy to install, and they provide OE-level quality, fit and performance. Plus, you'll find these premium struts cost the same or less than our major competitors.* See your local dealer or distributor for all the details.

Right part. Priced right.

*Products of comparable quality offered by major competitors.
